# Why we are doing this

The West Australian State Government requires all local governments to develop an integrated planning and reporting framework. The elements of the framework must be implemented by 1 July 2013.

The Strategic Community Plan (shortened to the 'Community Plan' in this document) is part of this Integrated Planning and Reporting framework. It sets the scene for the whole framework and expresses the community's vision and priorities for the next ten years and beyond. The plan gives us a method for establishing priorities and aligning them to operational functions. It will also support the development of improved services

and outcomes for the community and will continue to evolve to support the needs of our community.

Successfully implementing this strategic community plan will require a commitment from all those concerned, including the Shire of Nannup, residents, businesses, visitors, community organisations and all levels of government.

# A vision shaped by the community

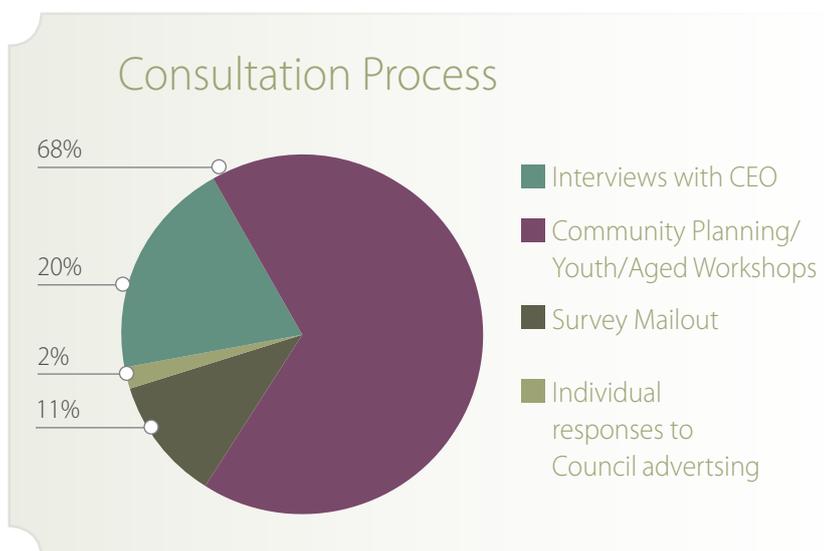

This is your plan and we want to get it right for you.

Community engagement is a process that allows people to participate in decisions that affect them, and at a level that meets their expectations. It helps strengthen the relationship between communities and government, enabling all the concerned groups to become part of the process.

Council used the objectives embodied in the planning consultation policy to develop the key aspects of this strategy:

1. Clearly define the level of consultation relevant to Council issues;
2. Detail the requirements for consultation based on the level of impact;
3. Outline the process Council will use when undertaking consultation and considering submissions;
4. Clearly define the levels of consultation required for a range of Shire functions in order for the community to be kept informed, comment on and respond to issues and proposals and gain a sense of ownership of key Council functions and activities.

This involved multiple forms of engagement to ensure the inclusion of a large cross section of the community. Consultation elements included the Community Planning Day workshop, Youth Planning workshops and our Aged Friendly Community workshops. A survey was sent to all residents to participate in the

process and personal interviews with the Chief Executive Officer included a wide cross section of the community. Advertising throughout the process for comment also produced responses.

To date, just over 24% of our community has participated. This has resulted in over 1,650 comments being collected from 305 people on a whole range of topics, which have been used to provide a guide to the future direction for Nannup. The comments have regard to current and future resource capacity, demographic trends (attachment 1) and strategic performance measurements.

Throughout the process we have been working with relevant government agencies to ensure we are in line with State and Commonwealth priorities so that we will receive support from these agencies on the identified priorities.

## What we did with the information

The aim is to produce a clear, concise document that meets the requirements of the legislation, but more importantly provide a useful tool for the Council and community.

All the information has been gathered, analysed and compiled, then categorised into key themes that matter most to the community. These key themes are Community, Environment and Leadership. The three themes supplied our 15 key focus points for our community's future.

During the process of consultation and analysing of data, Council has been reassured that the community's overall vision is in line

with the Shire of Nannup's existing Vision Statement, Mission Statement and our Values. (see appendix 2).

The vision also aligns well with our new branding of Rest, Connect and Grow as well as our current activities and projects.

Consultation is an ongoing process and new and evolving trends will be incorporated during subsequent reviews.

### Community

'We are a unique town that role models sustainability, friendliness, taking the time to celebrate our heritage and festivals'

### Environment

'Let's keep the charm and fabric of Nannup'

### Leadership

'A listening leadership that provides and represents all'

# Issues and challenges

Naturally, things like resources (both human and capital), budget, legislation and common-sense play a defining role in what can be achieved in our future direction.

Where we are directly responsible for an activity and resources permit, we are committed to delivering the aspirations set out in the Community Plan. Where we do not have direct responsibility or influence on the aspirations, we will advocate to those responsible and will work in partnership with them to make these aspirations a reality.

The majority of comments received have been summarised in the following tables, with noteworthy comments on other topics not directly referenced in this document being:

- ~ Amalgamation - need for independence
- ~ Rates increases becoming unrealistic – indirectly dealt with by balancing our environmental, social and financial requirements
- ~ Business trading hours – may be raised as part of a business forum / consultation
- ~ 85% of land being the responsibility of Department of Environment and Conservation – ongoing process working with this state government agency
- ~ Aligning with Councils and other agencies' plans and legislation (appendix 3).

## What happens next

The Community Plan's measures will help us track progress towards reaching its vision. Council will provide an update on its progress in achieving the strategies in this document, by providing an update in our annual report to the community.

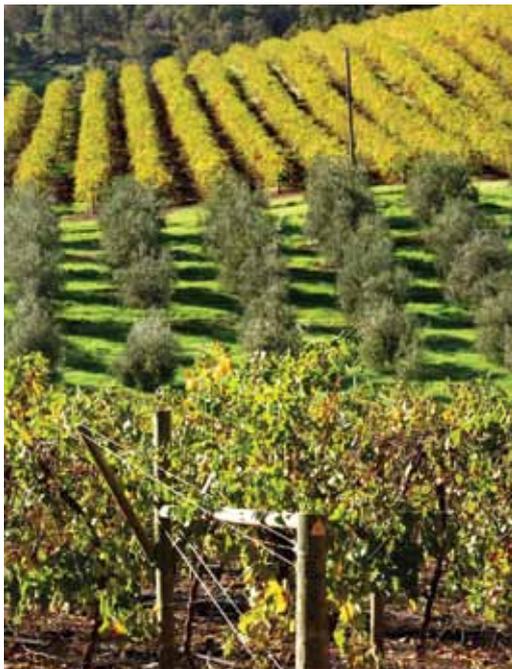

A strategic review of the Community Plan will be carried out two years after the adoption of the plan and a full review every four years. This is to reflect changing priorities, the external economic environment, other external regulations (attachment 2) and available funding.

## Planning our Resources and Performance

The Community Plan is a starting point – a beginning, not an end. Council is committed to continue its communication and involvement with the community and to developing a relevant and useful document. Importantly, an annual review of progress will be performed.

To support the successful implementation of the Community Plan, we have developed a Corporate Business Plan, Asset Management Plan, Workforce Plan and Long Term Financial Plan. These documents direct the Shire's resources, assets and funding toward the priorities, key projects and activities set out in our Community Plan.

The Community plan was developed with an understanding of our current resource capacity,

both financial, workforce and asset resources. Whilst future resource capacity is not known with certainty, expectations of relative future resource capacity have been considered.

### Current Resource Capacity

The 2012 audited Annual financial report reflected the following shire resource profile as at 30 June 2012.

### Future Resource Capacity

Future resource capacity is partially dependent on other levels of government however the following long term trends have been identified.

- **Asset Management Plan:** This plan assigns an agreed service level, a strategy and the required investment to maintain that asset at the agreed level for the whole of its life. The plan shows that investment of \$1.8m will be required to maintain the Council's buildings over the next 10 years. The Council has already started to provide for this need in its asset management reserve.

A review of the Council's infrastructure assets shows that they are in good condition and it is anticipated that current maintenance budgets are sufficient to maintain them at an acceptable condition.

Resource	Level
Workforce	25.76 FTE
Infrastructure Assets	\$85,580,220
Property, Plant and Equipment	\$5,468,143
Cash Backed Reserves	\$1,179,437
Borrowings	\$365,802
Annual Rate Revenue	\$1,127,596
Annual Revenue	\$11,334,088
Annual Expenditure	\$10,693,979

- Long Term Financial Plan:** This document sets out the financial resources required to deliver the objectives in the Community Plan. This shows the underlying financial resources of the Council are strong. However the reduction in grant funding for the construction of Mowen Road presents the Council with a significant challenge in 2014/2015. The Council is able to continue to fund its future projects through the considered use of reserves and external funding. The plan shows the Council reliance on external sources of funding to deliver its priorities. The workforce plan allows for dedicated support to identify and source this external funding.
- Workforce Plan:** This identifies the human resources and skills required to deliver the communities priorities for the next ten years. The workforce plan shows that a slight growth in the current staff levels will be adequate to achieve the objectives set out in the Community Plan.
- Corporate Business Plan:** Identifies and prioritises the principal strategies and

activities that Council will undertake in response to the aspirations and objectives stated in the Community Plan. It sets out in greater detail the resources required to deliver our priorities.

- Annual Budget:** The annual budget sets the resources for Council's day to day operations and capital projects. The majority of day to day operations are not referenced in the Community Plan as it concentrates on new initiatives identified by the Community.

## Appendix 1 Nannup, About Us

“Nestled in a peaceful environment, the Shire of Nannup is a supportive, connected community that encourages the unique aspirations of those who engage in it.”

### Location

Nannup is situated 288km south of Perth, and is geographically in the centre of the South West. The Shire of Nannup covers over 3,000 square kilometres, with a total population of 1,262 (2011 Census). Eighty-five percent of the Shire is under forest, however the rich soils, high rainfall and an excellent climate also provides ideal conditions for farming. Environment and heritage play a large role in the community's culture. Nannup boasts a variety of successful industries including beef cattle, horticulture, tourism, arts and crafts, floriculture, aquaculture, viticulture and timber processing.

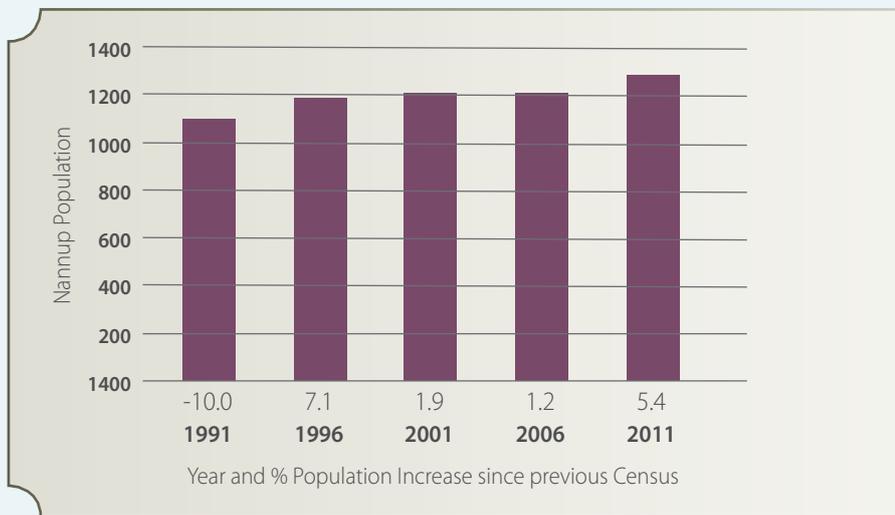

With National Parks and State Forest being a prominent feature in the Shire, it makes us a significant tourist attraction for the region and is popular with outdoor adventure enthusiasts. Nannup hosts several significant local events including the Nannup Music Festival, Flower and Garden Festival, and Forest Car Rally.

### History

Prior to European settlement, the Wardandi, Bibbulmun, Nyungar and other Indigenous groupings collectively influenced the botany of the areas surrounding the present Nannup locality. Following the European settlement

of Western Australia, in Albany and the Swan River in the 1820's, settlers subsequently occupied Augusta and then Busselton (Bussell) in the 1830's.

Settlers quickly looked beyond their immediate vicinity for additional grazing lands. One of the earliest, Thomas Turner of Augusta, followed the Blackwood River towards present day Nannup in 1834. Several expeditions followed in the 1840s, with consistent reports of good grasses. It would appear that some limited squatting commenced in the district during the early 1850's and considerable selections of land had been taken by 1860. The town was officially gazetted in 1890. The predominant industries of timber and agriculture exist to the present day, with recent diversification into tourism.

### Population

The population is spread throughout the Shire district with about half of the population residing in the Nannup town site.
