

### **Additional Information**

Besides growing and selling nutritious organic food for a livelihood, I created Nannup Community Forum facebook page a year ago , in response to the fact that the main Nannup Community Noticeboard page does not allow discussion of politics. The page has been an important platform for free speech, on any topic, in our community. I will be pushing for Nannup council to end it's reliance on glyphosate, as many councils are doing. It is no secret I have stood for fully informed consent, and within that context, medical freedom. in our shire. Freedom of choice in a vacuum of information has proven life threatening to many in our town, and my heart bleeds for them.
