NUCS	Nannup Uniting Church Service
RSA	Responsible Service of Alcohol
SDERA	School Drug Education and Road Aware
SON	Shire of Nannup
YAC	Youth Advisory Council
KSI	Killed or Seriously Injured

## Executive Summary

This strategic plan was developed by the Nannup Local Drug Action Group in collaboration with the Local Drug Action Group Perth to reduce alcohol and other drug related harm in the Shire of Nannup. The plan also incorporates strategies for addressing road safety.

The Nannup Local Drug Action Group has representation from the Nannup Police, Nannup District High School, Shire of Nannup, St John Ambulance, Nannup Health Service, Roadwise, St John of God Community Alcohol and Drug Service South West, Nannup Community Resource Centre, and local Community members.

Using our consultation with the local community and service providers through our Community Perception Survey, the following target groups have been identified for this Strategic Plan:

1. Young people under 18 years of age
2. Parents of children and youth
3. The adult community who drink alcohol and consume illegal drugs.

The development of a Strategic Plan seeks to guide Nannup Shire Council, stakeholders, service providers and community in;

**a) reducing the level of harmful alcohol and other drug use in the region by:**

- Supporting partnerships between community and service providers, identifying and addressing local issues,
- Guiding the allocation of resources and funding to implement actions and strategies, and
- Providing a means to evaluate an evidence based, whole of community prevention approach in a timely and appropriate manner.

**b) Reducing road trauma by:**

- Implementing awareness and education strategies with a particular focus on driving whilst under the influence of alcohol or illegal drugs.

## History

Nannup LDAG was established in 2003 in conjunction with the Youth Advisory Council, supported by Council's Community Development Officer.

LDAG has traditionally had a youth focus in Nannup, supporting young people to participate in skills development, youth leadership programs, camps and school holiday programs.

In 2015 the decision was made to expand the membership of the group to include stakeholder agencies and community members, formalising the structure of Nannup LDAG.

In 2016 the Nannup LDAG applied and was successful in also being recognised as a Local Drug Action Team (LDAT), the National equivalent of the LDAG. Funding was received to commence implementing the Strategic Plan and a Project Officer was appointed.

LDAG was approached by Roadwise to establish a community reference group in Nannup. As the same stakeholders would be involved in both groups, it was decided to merge the group and to incorporate Roadwise activities into the strategic planning. In 2017 discussion commenced with the Mental Health Commission to transition the Nannup LDAG Strategic Plan to an Alcohol & Other Drugs Management Plan.

The ultimate goal is to transition to a community driven organisation with shared responsibilities for ensuring the strategies and objectives are actioned and evaluated. In 2019, the Nannup Youth Zone was created with this in mind, however due to the Covid 19 Pandemic, growth of this facility was stunted. In July 2021, the Alcohol.Think Again Nannup Youth Zone was revamped, and will be utilised to ensure the youth in the community have access to a space where the above can be developed.

## **Demographic Data**

The Nannup Shire is located in the South West region of WA. It is surrounded by the Shires of Augusta-Margaret River to the west, Busselton to the north-west, Donnybrook-Balingup to the north-east, Bridgetown-Greenbushes to the east and Manjimup to the south-east. It also possesses some coastline to the south.

It has a current population of 1,400 (est 2019). The population has a median age of 53 years (2016), an increase from 41 years in 2001. Residential housing is more affordable than Metropolitan Perth and Regional WA.

Nannup's economy was \$90 million in 2018-2019. The dominating factors driving the region are agriculture, and manufacturing. Combined, these account for over 40% of local economy, however the economic growth in the region is well below the Western Australian state average of 3.2%, with Nannup coming in at 1.2% per annum.

The Shire's population has not grown in line with the South West region nor the State. Combined, these factors leave the local economy exposed to risks if one of the key industries was to be severely impacted by a natural disaster, epidemic or other economic shock.

Furthermore, Nannup has a significant volunteer economy, indicating a highly cohesive, integrated and supportive community.

## Understanding the Issues

In 2020, Nannup LDAG completed a Community Alcohol and other Drug Perception Survey which yielded a response from 48 people; however general data can be collected from the *Alcohol and Other Drug Indicators Report of the South West Health Region*.

The South West Health Region covers an area of 23,998 square kms with an estimated residential population in 2020 of 181,801 which represents 6.8% of the States' population. The boundaries of this area cover north to Pinjarra, south to Augusta and east to Walpole and Collie.

Data has been collected by a number of health and wellbeing indicators, with each year over 6,000 people interviewed.

Alcohol is a depressant drug, which means it slows down the messages travelling between the brain and the body. (Drug Info 2014). The short term immediate effects of alcohol consumption include confusion, blurred vision, clumsiness, nausea and vomiting, passing out and coma. The long term effects of risky alcohol consumption include breast cancer, heart disease, bowel cancer, stroke and cancer of the mouth (Drug Info 2014).

The estimated per capita per annum pure alcohol consumption for the South West Health Region and Western Australia is outlined as:

Per Capita Consumption (PCC) PCC pure alcohol (litres)

Year/s	SW Health Region	WA
2005/06	13.75	11.23
2006/07	12.93	11.10
2007/08	12.30	12.72
2008/09	12.93	11.69
2009/10	13.25	12.37
2019		11.94

\* Please note that there was no recent data for the SW Health Region for 2019

From 2006 to 2013 the percentage of people who do not drink has increased by 8.9% however the proportion of individuals aged 16 and over, who undertake risky drinking behaviour has increased by 1% in this time frame. This indicates that whilst more people are refraining from drinking, a small percentage of the population are partaking in risky drinking behaviour.

Research shows that the later young people delay their alcohol drinking, the less likely they will become regular consumers as an adult and avoid alcohol-related problems later in life.

Research shows that alcohol is involved in approximately 50% of all domestic and sexual violence cases and that almost 80% of Police attended incidences are related to alcohol (National Health & Medical Research Council, 2001 and Doherty and Roche 2003).

There is evidence that alcohol consumption and sport is normalised and impacts on the general health and wellbeing of the community. Contributing factors that support this drinking culture include alcohol consumption in sporting clubs as a social norm and the reliance of sporting clubs to cover operational costs through the sale of alcohol.

In November 2015 new laws were introduced regarding the secondary supply of alcohol. It is an offence for anyone to supply an under 18 year old with alcohol in a private setting without parental or guardian permission.

In 2017 in Australia, 4186 people died due to alcohol, which equates to one person dying every two hours due to alcohol (Australian Bureau of Statistics). In 2017, an average of 15 ambulance per day were called to attend West Australians for the primary reason of alcohol intoxication.

In 2018, a snapshot survey showed that more than 1 in 6 presentations to emergency departments in WA were related to alcohol. WA had the highest rate of alcohol-related presentations in the country. Alcohol related presentations to Royal Perth Hospital emergency department cost an estimated \$7.5 million per year.

Drug offences for the South West Health region has increased from 2009 to 2013 by 202 reported incidents.

The Nannup Police Station has recorded the following infringements from the 1<sup>st</sup> of January to the 28<sup>th</sup> of October 2021:

- Two drink-driving charges
- Four other related driving charges
- 21 drug related charges

Road Safety Commission statistics for Regional WA ([www.rsc.wa.gov.au](http://www.rsc.wa.gov.au)):

- 84 Regional Road Fatalities (to the 3<sup>rd</sup> of November, 2021)
- 537 people died in reported crashes between 2016 & 2020.
- 666 people were KSI in Regional WA in 2020
- 65% of people KSI were male
- 23% of people KSI were aged 20-29yrs old.

According to the Road Safety Commission statistics the key behaviours involved

<b>Strengths</b>	<b>Weaknesses</b>
------------------	-------------------

in fatal and serious crashes for the period from 2016-2020 were:

- Seat belts were not worn by 11% of vehicle occupants killed or seriously injured.
- Helmets were not worn by 29% of cyclists KSI
- Speed was a factor in the crashes of 26% of people KSI
- Inattention was suspected to be a factor in the crashes of 8% of people KSI
- Research indicates 21% of fatal and serious crashes involve fatigue.\*\*

Road Safety Commission Statistics for South-West WA ([www.rsc.wa.gov.au](http://www.rsc.wa.gov.au)):

- 250 people were KSI in 2020
- 1,282 people were KSI between 2016 and 2020
- 65% of people KSI were male
- 23% of people KSI were aged 20-29yrs old
- 18% of people KSI were in crashes that occurred on a Saturday
- 22% of people KSI were in crashes that occurred between 3:00pm and 5:59pm

According to the Road Safety Commission Statistics, the key behaviours involved in fatal and serious crashed for the period from 2016 – 2020 were:

- Seatbelts were not worn by 6% of vehicle occupants KSI
- Helmets were not worn by 30% of cyclists KSI
- Speed was a factor in the crashes of 27% of people KSI
- Inattention was suspected to be a factor in the crashes of 9% of people KSI
- Fatigue was suspected to be a factor in the crashes of 17% of people KSI

### Emerging issues:

- Dual road use of cyclists and motor vehicles increasing
- Increase in Mountain bike cyclists and pump track education required
- Nannup is reportedly a conduit for drugs between Busselton/Margaret River to Manjimup
- Perceived increase in psilocybin (magic mushroom) gatherers

## **Nannup Youth Zone:**

In 2021 the Shire of Nannup expanded the LDAG program and developed a whole of community engagement program with Alcohol Drug Foundation; Creating Opportunity for Young People valued at \$39,865. Further investment was achieved through Healthway and Lotterywest with a total budget of \$61,035 to expend between July 2021 – June 2022.

Healthway - Youth Zone 2021 \$5,000, exclusive naming rights to Nannup Youth Zone 2021 “Alcohol. Think Again Youth Zone 2021”

- Hours for Youth Zone Officer (up to \$1000)
- Catering afterschool sessions (up to \$1000)
- Catering School Holiday events (\$1100)
- 8 x Sport and Recreation events (\$1200)
- Contribution towards events (\$500)
- Promotion including boosted posts (\$200)

Lotterywest – Youth Zone 2021 \$8,500

- Pool Table (\$500)
- Youth Zone Officer Hours (\$2000)
- Catering Afterschool sessions (\$900)
- Community Café Food budget (\$2000)
- 8 x Sport & Rec events (\$1800)
- Contribution towards events (\$500)
- Promotion & printing (\$800)

The Shire of Nannup is contributing through the Youth Program budget (\$7,670)

## Action Plan

### 1. Young People Under 18 Years of Age

Issue	Event	Details	2017/18	2018/19	2019/20	2020-21	Who
Youth Engagement	Family Fun Day <i>Total budget \$16,000</i>	Alcohol consumption reduced/ prevention/minimisation  Education	Strive \$3000 community	Strive \$3000 community	Strive \$3000 community	Strive \$3000 community Healthway \$5000 SWCC \$2500 Shire of Nannup & door sales \$5,500	Committee YAC

## Evaluation

The implementation of the Strategic Plan provides the tools to evaluate the actions in relation to the identified objectives:

- *Supporting partnerships between community and service providers, identifying and addressing local issues,*
- *Guiding the allocation of resources and funding to implement actions and strategies, and*
- *Providing a means to evaluate an evidence based, whole of community prevention approach in a timely and appropriate manner.*

Individual projects that are grant funded will be evaluated against the pre-determined evaluation objectives.

In general, evaluation tools include:

- Ensuring strong engagement and participation of stakeholder agencies in the Nannup LDAG,
- Partnerships developed with key agencies throughout the South West and metropolitan area as identified by the Nannup LDAG,
- Ongoing monitoring of projects,
- Ensuring pre and post data is collected to ensure accurate evidence based information is collated, and
- Ensure registration forms and participation sheets are completed at each activity.

Evaluation and reporting on each project may include but is not limited to:

Objectives	Outcomes	Key Indicators
Youth engagement	<p>Young people are engaged in and take pride in their community.</p> <p>Anti-social issues in young people are minimised</p>	<p>Positive statistics and data reports.</p> <p>Increase in successful initiatives.</p> <p>Community led initiatives developed.</p> <p>Number of young people who assist in management of events and activities.</p>
Youth at risk	Young people are aware of support services available to our community.	Positive statistics and data reports.
Youth, alcohol and sport	<p>Community members are educated and acknowledge that alcohol is not required along with sport to have fun</p> <p>Young people are supported to participate in sporting activities.</p>	<p>Number of community sporting events hosted increases that do not involve alcohol.</p> <p>Positive statistics and data reports.</p>
Youth leadership	Young people are empowered and develop skills to manage events and activities.	Positive statistics and data reports.
