Attn: Planning Officer  
Nannup Shire

Subject: **Development Application – Gravel Extraction**

Please find attached with this letter a copy of the Development Application and the Application for Development Approval.

The proposed extractive industry consists of continuing operating a previously approved gravel pit, with no further proposed expansion. No variation on previously approved operations is sought. The revised approximate capacity of the gravel quarry is 100,000 TPA for the requested 15 year lifespan. I am the owner-operator of this gravel pit.

This is an existing gravel pit which provides the owner and supplies additional contractors with base-course gravel and rocks, which is primarily used for roadworks and domestic clients in the Shire. The current pit and areas to still develop are located on cleared farmland. The original approval for the application for extractive industry was approved by the Shire of Nannup Council in October 2003, and the approval was for a period of 15 years. The second approval granted by the Shire of Nannup was in November 2020, for a period of 5 years. As no further expansion or changes to resource extraction methods are proposed, there is a 15 year anticipated completion date for productive excavation, hence the 15 year approval request.

There will be no clearing of native vegetation to expand the gravel pit into the previously approved areas as the area proposed for extraction is cleared pasture for agricultural purposes. Road access is well established and maintained.

Sincerely,

A handwritten signature in black ink that reads "Ben Worthington". The signature is fluid and cursive, with a long, sweeping underline that extends to the right.
